The IntiSolutions Group Joins The Google Apps Authorized Reseller Program

November 9, 2010 – The IntiSolutions Group today announced it has become an authorized reseller of the Google Apps™ suite of communication and collaboration tools. The IntiSolutions Group will focus its efforts on increasing the bottom line for Calgary and Alberta based businesses by helping both start ups and existing businesses utilize the Google Gmail, Calendaring and Contact Management Solutions. As well as helping with messaging, The IntiSolutions Group is offering support and transition services to help clients take advantage of Software As A Service technology with Google Docs and Google Apps.

Shaheen Bhimani, Technical Director of The IntiSolutions Group says, "The Google Apps Reseller program will help us provide Google Apps to users of the Calgary energy sector. The Google Apps Premier Edition offers a broad set of powerful APIs that enable us to convert existing clients and new businesses to the Gmail infrastructure with ease."

Google Apps brings simple, powerful communication and collaboration tools to organizations of any size – all hosted by Google to streamline setup, minimize maintenance, and reduce IT costs. With Gmail (including Google email security, powered by Postini), Google Calendar, and integrated IM, users can stay connected and work together with ease. And, using Google Docs and Google Sites, which include word processing, spreadsheet, presentation and website creation tools, they can share files and collaborate in real-time, keeping versions organized and available wherever and whenever users work.

The Google Apps Reseller program includes resellers, consultants and independent software vendors that sell, service, and customize Google Apps Premier Edition for their customers. The IntiSolutions Group received training, support and deployment services from Google, as well as access to APIs for integrating Google Apps into their customers' business operations. The IntiSolutions Group maintains a close relationship with their customers in order to provide additional service and support. The businesses receiving Google Apps will benefit from the additional attention to their specific needs.
