SUMMARY:

DUNS: 828573415
CAGE CODE: 58EN7

INTERIOR FUSION, LLC is an SBA-certified Service Disabled, Veteran Owned, Small Business (SDVOSB) with headquarters in Tampa, Florida. Our CEO is Mr. Richard Fendley (MSG, USA, ret.).

We deliver cost-effective, value-added services to support all agencies, branches, and departments of the US Government as well as the UN, NATO, NAMSA, and defense contractors. We conduct both domestic and international business, particularly in Africa, the Middle East, and Europe. Our market reach extends to all parts of the globe.

Interior Fusion through its direct from manufacturer agreements has a vetted pool of small, medium, and large businesses including SDVOSB, 8a, HUB Zone, & Woman-Owned firms. These partnering relationships allow us to leverage a broad range of products and services in order to deliver innovative solutions, efficiently, 24/7, in one seamless package, to our clients worldwide.

We have achieved our success on four fundamental principles:

1. **CLIENT FOCUS:** Our client's best interest is our first and foremost guiding principle.
2. **TEAMING:** In support of our client's interest we seek to encourage the exchange of innovative approaches that results in beneficial synergies towards the challenges facing our client's objectives. We have achieved this not through individual gains but through a collaborative approach.
3. **VALUE ADDED:** We only take on efforts where we add value by our participation through conception, planning, design, performance, and continuous process improvements.
4. **LOGISTICS:** We tailor each and every shipment to our client's objective. We deliver on time and according to terms & conditions agreed upon, regardless of the operating environment.

A&E SERVICES

Our lead A&E partner is one of the largest MEP and engineering firms in the country. The 350+ person staff includes 90+ PE's, 30+ EI's, 90+ LEED accredited professionals, 18 ACG Certified Commissioning Authorities, and 1 certified Indoor Air Qualified Professional. In-house services include MEP Services, Structural Services, Communications & Technology, Computer & CADD Applications, and Sustainable Design, LEED Consulting and Commissioning Services. They are currently using AutoCAD ABS 2009 and REVIT BIM Software as our drafting/design and building modeling platforms. Specifications are provided using the latest Masterspec and Specsintact programs to ensure completeness and coordination. Our Energy modelers are very experienced in the use of E-Quest as the platform for energy analysis and life cycle equipment costs to ensure that our designs provide the most energy efficient buildings possible. Project experience includes federal, state and local government, healthcare, education, hospitality, and commercial construction, industrial and institutional work. Areas or work include CONUS and OCONUS. CONUS projects have been completed in 41 states. Our lead A&E teaming partner is currently working on or have recently completed OCONUS projects from as far West as Guam, East as Afghanistan, North as Alaska and South as the Cayman Islands and Guantanamo Bay Cuba. Sustainability and Green Design are core concepts included in all designs. Our lead A&E teaming partner has as of today 60+ LEED Certified or higher projects including 25 Silver, 22 Gold and 1 Platinum project.

Interior Fusion together with our A&E and Construction (SDVOSB) teaming partners can design virtually any building or infrastructure project required to support client needs worldwide.

CONSTRUCTION SERVICES

Our lead teaming partner herein is an SDVOSB owned and operated by a retired Colonel from the U.S.M.C. Together we provide Construction Program Management, Project Management, Consulting Services, Project Life Cycle Services & training worldwide.

Our partner is only one of a few firms that have the expertise to manufacture and erect K-span buildings in the United States. We have years of experience designing and building all types of K-span buildings internationally. K-span is a quick and cost effective building to construct as a commercial facility as well as many other types of facilities.

Together, we are capable of delivering expeditionary construction projects on time, within budget, and to bring challenging projects back in line with client expectations. We specialize in planning and managing projects located in challenging environments and those under critical time constraints. Integral to our success is continuous risk mitigation throughout the project lifecycle. We are organized, staffed, and equipped to engage rapidly and effectively with the client and project planners to get and keep projects on course, regardless of location or conditions.

CONSTRUCTION SERVICES (con't.)

The following is a short list of what our construction teaming effort may provide clients worldwide:

- Project leaders who are highly seasoned and proven construction professionals immediately available to deploy into expeditionary roles and environments
- Continuous on-site leadership
- Client interface and coordination—Customer satisfaction is Job #1
- US citizens, Third Country Nationals (TCNs), and Local National leaders
- Skilled in managing international and locally contracted labor
- AFCEE- and Corps of Engineer-experienced engineering and design services supporting all submittal requirements
- Project management skills training to develop more capable, effective local subcontracting resources
- Construction project management and consulting services to meet schedule and budget
- Multiple and complex design-build construction projects
- Traditional brick and mortar and Pre-engineered / manufactured construction techniques
- Ultimate Building Machine® (UBM®) and Automatic Building Machine® (ABM®) SME's
- Integrated and Coordinated planning with M.I.C. Industries
- Training, assistance, maintenance, and implementation services
- Pre- and Post-sales design, engineering, and procurement planning
- Full range of project management and consulting services
- Logistics planning and execution
- Financial and schedule reporting

Project Focus:

- Traditional and pre-engineered / manufactured facilities
- Specialty buildings pre-engineered mono shell
- K-Span® style buildings using Ultimate Building Machine® (UBM®) and Automatic Building Machine® (ABM®) technology
- Steel Master Structures
- Commercial Steel Standing Seam Roofing with new solar technology.

RELOCATABLE BUILDINGS (RLB'S)

Interior Fusion has multiple manufacturers for the worldwide provision of Relocatable Building (RLB's) including Containerized Housing Units (CHU's), Containerized Office Units (COU's), and Containerized Medical Units (CMU's). The container modules and any assembled configuration will be engineered to withstand structural and other loads, thermally induced or other movement, and exposure to extreme weather without failure or infiltration of water. The CHU/COU/CMU's shall be capable of standalone application or may be integrated with other CHU/COU/CMU's. Container modules can be placed side-by-side or stacked in various integrated configurations for limited space requirements including operation efficiencies and the minimization of utility and infrastructure installation. The structure shall include steel skid or other features or components that will provide flexibility and ease of relocation from one location/project to another. The CHU's, COU's, & CMU's have full internal system capabilities that provide comfort and life support features suitable for extreme climates and conditions.

POWER GENERATION & LOW VOLTAGE PRODUCTS & SERVICES

We can provide turnkey design/build projects for the electrical sector. Interior Fusion can supply power generation and distribution on a temporary or permanent basis significant for major generator manufacturers. We have emergency power generation & portable power distribution kits available for immediate deployment worldwide.

MEDIUM & HIGH VOLTAGE ELECTRICAL PRODUCTS & SERVICES

Interior Fusion operates a coordinated effort from its headquarters in Tampa, Florida and supported 24/7 by its overseas' desk in Switzerland. We are able to tap into the vast in-country resources of electrical transmission and distribution manufacturers across Africa, Asia, Europe, North America and South America. We can provide sales and service support by certified manufacturer's engineers and technicians worldwide and usually within 24 hours of NTP for medium and high voltage requirements dependent on that the original manufacturer's installation guidelines have been adhered to and that are in line with warranty specifications.

STEEL

We can procure, stage, consolidate and deliver almost any type of painted or bare, aluminum and steel, including **K-Span**, standing seam roofing, panels, coils, and flat steel sheets to make flashings. All accessories such as screws, rivets, clips, caulk, butyl tape and all the tools necessary for fabricating and installing metal standing seam roofing. In stock items include: NSN 5450-01-339-3340 .040MIN X 23.750" X COIL, NSN 5450-01-339-3341 .040MIN X 35.750" X COIL, NSN 5450-01-353-5769 .060MIN X 35.750" X COIL, NSN 5450-01-361-6540 .035MIN X 23.750" X COIL.

BULK FUEL

Interior Fusion's dedicated teaming partner herein was selected due to its experience in the supply of bulk fuels and fuel delivery systems for MOGAS, AVGAS, JP-8, TS-1, and diesel across Africa, Asia, and the Western Pacific. Countries of service include Chad, the Democratic Republic of Congo, the Solomon Islands, Papua New Guinea, and Timor Leste.

FUEL DELIVERY SYSTEMS

Aerial Delivered Bulk Fuel (ADBFI), Forward Aircraft Refueling (FAR), Framed ISO Bulk fuel Installation, Containerized Ground Fuel Stations, Temporary Bulk Fuel Installations, Rapidly Deployable Airfield Bulk Fuel Installations, Containerized Field Aviation Stations, Mobile Fuel Containers, Air Portable Fuel Containers, Fuel Depot Installations, Marine Offshore Applications, Shipboard Fuel Systems, Marine Helicopter ground-to-air-refueling, complete HSE policies & procedures, & inventory control systems.

HAZMAT, CBRNE

Our dedicated manufacturers can provide decontamination shelters, kits, and PPE for Chemical, Biological, Radioactive, Nuclear, and Explosive environments.

MEDICAL EQUIPMENT & SUPPLIES

Our manufacturer is the largest privately held provider of medical supplies in the U.S. and provides a wide range of healthcare products and consulting, utilization, and clinical support.

MODULAR CRANE SYSTEMS

Whether you need to lift 25 pounds in a workstation, or move 25 tons across an aircraft hanger, our dedicated manufacturer's systems allow you to perform your jobs safer, faster, and more efficiently. We offer a complete line of Cranes, Monorails, Ergonomic Lifting Systems, and Fall Arrest products have a proven track record for performance, reliability and maintenance free operation for over 60 years. The United States Military has utilized these products in aircraft maintenance facilities, vehicle maintenance centers, and machining centers. The modular systems design allow for faster installations and transportability as field requirements change.

OFFICE & FURNITURE SYSTEMS

Our division for Government Business Products is a dedicated federal government vendor of office supplies, computer supplies, printer supplies, medical supplies, break-room and janitorial supplies, office furniture and office supplies.

O.E.M. PARTS

We provide O.E.M parts for autos, trucks, vessels, aircraft, material handling equipment (MHE), earth moving, mining, heavy equipment (HE), HVAC, power generation, transmission, & distribution.

LOGISTICS

It should be noted that Interior Fusion has access to CENTCOM approved warehouses in Turkey that can serve as a platform for both ready capacity and on-demand mobilization for the AFRICOM, EUCOM, & CENTCOM AOR's. Our dedicated SDVOSB teaming partners for Logistics are SDVOSB's based within the Continental United States. Certifications include FMC licensed, NVOCC licensed, IATA licensed, full vessel chartering, Licensed US Customs Brokers with pre-clearance of cargo up to five days prior to vessel arrival, as well as Remote Filing Authorization (RFA), C-TPAT, CCSF, and TSA Cargo Screening Pilot Program. Our partner is also HAZMAT certified up to and including radioactive material handling. Infrastructure through the World Freight Group includes representation and door delivery capabilities in more than 100 countries and 388 air and seaports, plus an internal network of agents providing services to virtually every point on the globe. Robust online tracking, report generation and project management available via Integrated Export Systems ERP. Capabilities include: International Airfreight, International Ocean Freight, Domestic Air Freight, Domestic Ground Freight, Export Packing & Crating, US Customs House Brokerage, Cargo Screening, & Project Cargo services.

We value the opportunity to take on your toughest challenges anytime and place.

Respectfully Yours,

Ray Lavado
