

HEALTH PROFESSIONALS SPEAK

... ABOUT "WHY SHAKLEE?"

DR. NEIL PADGETT, M.D.

Internal Medicine

Glen Burnie, Maryland

"The reason that I have recommended only Shaklee to my patients is that I have clinical, peer-reviewed data included in the catalog that I can refer to. You have to have good clinical studies, good double-blind peer-reviewed studies in order to evaluate a product. As a medical professional, that's the only thing that I'll listen to. Except for Shaklee, I'm not aware of anyone who's done in-depth studies. It's the only company I've seen do it and that's why it's the only company I can professionally recommend."

DR. STEVE CHANEY, PH.D.

Professor of Nutrition, Biochemistry & Biophysiology

University of North Carolina Medical School

"One of the biggest mistakes people make is taking inexpensive vitamins. Mail order vitamins offering fantastic "deals" are worth just about what you pay for them. NEVER buy these vitamins or supermarket/pharmacy brands without checking them out first. Cut-rate products often contain additives, food allergens, sugar, artificial food coloring and flavoring. Many are coated with shellac or contain potentially hazardous chemicals like chlorine. Shaklee performs up to 176 separate tests for purity, freshness, potency, and safety on the raw ingredients for a single product. Products undergo as many as 262 separate quality assurance tests throughout the manufacturing process as well. In addition, all product label claims have documented substantiation."

DR. LINDA RODRIGUEZ, M.D.

Pediatrics

Virginia Beach, VA

"As a physician and pediatrician, I demand scientific validation of the products I use in my practice. Smart supplementation today means taking the right amounts with the right formulation, and Shaklee has made it so easy for us to do that now. For over 25 years, Shaklee has been a blessing for me, my family, and my patients who have all benefitted from scientifically proven products for quality health and healthy living. Our food today is so deficient in nutrients because of what we have done to it. It is no longer the same food that nature offered to us. For my fellow physicians who are looking into incorporating nutrition in their practice, I encourage you to consider using Shaklee's quality health products that you can trust and recommend with full confidence."

DR. MYRON WINICK, M.D.

Columbia University College of Physicians & Surgeons

“Shaklee Products are very well tested both from a standpoint of efficacy and safety. I consider Shaklee’s study of bone loss and their [Vita-Lea] product’s relationship to bone loss not only important from a standpoint of their product, but important from a standpoint of the scientific community’s understanding of bone loss. . . . I think it’s very impressive that the Shaklee scientists are willing not necessarily to go with the flow, but rather to go with the science.”

DR. ANNETTE DICKINSON, PH.D.

Council for Responsible Nutrition

“You need to select a manufacturer that you can trust. Unfortunately, there are some unscrupulous entrepreneurs out there who will try anything and who are marketing street drug knock-offs or recreational drugs under the name of dietary supplements. One of our biggest problems today is that there are some small manufacturers on the fringes of the industry who make products that don’t meet necessary standards and gives a black eye to the whole industry. Quality companies, companies like Shaklee Corporation, are making a stand for quality products and for truthful information and we believe that is very important.”

DR. R. WILLIAM SOLLER, PH.D.

Consumer Health Care Products Association

“Shaklee is a very important force at the forefront in terms of helping to cultivate the field of self-care.

FOROUZ ERTL

Botanicals International [one of the world’s leading suppliers of raw materials to major manufacturers world-wide]

“Shaklee has some rigorous standards that they actually initiated in the industry. . . . Shaklee is definitely our pickiest and most strict customer. They are very demanding, and they have specifications beyond and above the specifications set by our other customers. I think for a lot of customers, price is an issue when they are choosing botanicals, but I wish they had the awareness about the quality of the botanicals and the quality of the brand before they make their decisions. I tell my friends, that if they want to buy quality, they have to buy Shaklee.”

DR. CHRISTOPHER SCOTT, M.D.

Saskatoon, Canada

"Supplements are absolutely crucial due to the quality of our soil and food today. There are a lot of different supplements available on the market, but labels do not accurately reflect contents. Over the past ten years, I have been using Shaklee supplements for personal use, as well as confidently recommending them to my patients."

DR. KATHY WICKENS, D.C.

*Chiropractor
Perth, Ontario*

"Patients get results with Shaklee! There is a definite difference in the holding patterns for chiropractic adjustments for patients taking Shaklee supplements."

TAK-SING TANG

*Registered Pharmacist
Athens, Georgia*

"In my 30 years practice of pharmacy, I have not found any other company that can even come close to the standard of excellence as that of Shaklee. I have learned through the years that proper nutrition is the key to getting well and staying healthy, and that medication is not the answer to the increasing health disasters that we are facing. Over the past few decades more and more drugs have been recalled and or withdraw from the market due to damaging side effects, including death. I have watched patients start out taking 1 or 2 medications, then years later taking 10 to 20 or more because drugs mainly treat the symptoms while harming/destroying other vital organs. I could only recommend medication for short term usage, and that any chronic issues be addressed through proper nutrition and supplementation. After learning the superior quality of Shaklee and their vigorous testing process, as well as seeing how effectively these vitamins and supplements have benefited our family and friends, I eagerly recommend Shaklee products for everyone."

CHARLENE DAY

*Registered Nutritional Consultant
Toronto, Ontario*

"I have been in practice for over 26 years and have used many brands of supplements, including professional brands. About 7 years ago, I was given information about the Shaklee Corporation. I was impressed when I read that over 100 research studies and articles about Shaklee products were published in prestigious nutritional and medical journals. Wanting the best for my clients, I started recommending Shaklee supplements. I was amazed at the results. My clients experienced a level of wellness far exceeding anything I had experienced in the previous 19 years."

DR. FRANK PAINTER, D.C.

*Chiropractor
La Grange, Illinois*

"I was first introduced to Shaklee in March of 1997. Previously, I had been taking supplements and felt 'reassured' that I was doing the right thing for my health. I was challenged to try the Shaklee wellness program, and within a month I noticed significant improvements in my energy, endurance, and overall health. Since that time I have whole-heartedly recommended Shaklee products to my patients."

HARRY SHURLEY

Registered Pharmacist

Augusta, Georgia

"Why do I take Shaklee vitamins when I can get others as samples for free? From a pharmacist's view, you have to look at the clinical research that is done by Shaklee. While writing a book on prenatal nutrition, [my collaborator and I] requested clinical studies from the makers of prenatal vitamins and no major company, except Shaklee, could provide us with any studies! Also, the Shaklee vitamins are natural as opposed to the synthetic prenatal vitamins available in drug stores. There are so many reasons why I take Shaklee over the vitamins I could get from pharmaceutical companies. But the main reason is because the Shaklee vitamins produce results!"

DR. CHRISTIANE NORTHRUP, M.D.

Obstetrician/Gynecologist

author of *Health Wisdom for Women*

. . . states that Shaklee's Vita-Lea is the best pre-natal vitamin she has found. She never has problems with her patients becoming anemic like many of her colleagues do. The cost of Vita-Lea is . . . a small price to pay for so much nutritional insurance. "It is so important for adults and children to take a Vita-Lea (multi) tablet twice a day in order to fill in the gaps in the diet and to give your body everything it needs for healing and repair (which takes place while you sleep). People who think they eat 'very well' are surprised to find out that minerals and trace minerals are very low in supermarket foods, due to early harvesting, transporting, and storage. Of all the vitamins on the market, Shaklee supplements are different. Vita-Lea is made primarily from organically-grown vegetable sources, cold-processed to preserve enzymes, and contains exactly what the label states. Not only that, all Shaklee supplements are clinically tested to make sure that what is on the label is actually absorbed."

RUSTY & JUNE OST

Registered Pharmacists

Cape Coral, Florida

"Twenty-five years ago, Shaklee was the only company that responded to our request for clinical studies that back up their specific products. Now 25 years later, Shaklee is still the industry leader in scientifically-based double-blind clinical studies, and they publish those studies in peer-reviewed journals. Because we are scientists and healthcare professionals, this is what we expect. Why should anyone else expect less?"

DR. RICK MEDORA, D.C.

Chiropractor

Kingston, Ontario

"The most trusted name in clinical science is Shaklee."
