

New hope for COPD patients, new product combination offers relief and results

COPD, or chronic obstructive pulmonary disease, is a progressive disease that makes it hard to breathe. "Progressive" means the disease gets worse over time.

COPD can cause coughing that produces large amounts of mucus (a slimy substance), wheezing, shortness of breath, chest tightness, and other symptoms.

Cigarette smoking is the leading cause of COPD. Most people who have COPD smoke or used to smoke. Long-term exposure to other lung irritants, such as air pollution, chemical fumes, or dust, also may contribute to COPD.

COPD is a condition that doctors are not giving much hope to patients. The common response that doctors give is that this is a degenerative disease and they prescribe Cortisone. The feedback from almost all patients is that this drug does nothing for them to improve the condition or symptoms. With this outlook patients suffering from COPD feel they have little no hope that their condition or quality of life won't be improved.

Pivotal Health provides a product combination that has had a huge success for people suffering from pulmonary conditions and COPD. The products we are having such great success with will treat your condition in multiple ways.

The first and two main products we are offering is Serracor-NK and Serra RX80 , these products where designed and formulated to dissolve scar tissue that is

READ ABOUT THE SUCCESS FROM ONE OF OUR PULMONARY FIBROSIS PACKAGE USERS:

I wanted to express my thanks to you for the help that your products have provided my husband. He is 70 years old and has been diagnosed with advanced Pulmonary Fibrosis. He was evaluated, but did not qualify, for a lung transplant. We were left with no alternatives whatsoever. Our son found the Pivotal Health web site and what a blessing that is proving to be. My husband has been taking the complete Pulmonary Fibrosis package for a little over a month now, and the improvement is remarkable. After dropping from a 40 inch waist trousers to a 32 inch, his appetite was almost nil. He ate perhaps 2 peas, one bite of meat, and one bite of bread and sometimes that was it for the day!! He is now eating serving sizes that he ate before he was diagnosed. His skin color has gone from gray to pink, his breathing has improved tremendously.

being built up in lungs that is causing the fluid to fill the air sacks in the lung area. We have many success stories from people suffering from Pulmonary conditions the feedback confirms that Serracor-NK and Serra RX80 are the most effective products for addressing scar tissue build up in the lungs that is essentially blocking oxygen absorption and creating mucus that is filling up the lungs . To address the mucus that is forming in the lungs, we offer a product called Clear Lungs. Clear Lungs is by far the most effective all natural expectant that we have ever seen. People are reporting that within the first 30 days they are seeing a significant decrease in mucus and phlegm. This is a phenomenal product that you will only have to be taking for the first 30 to 60 days as this product works quickly. Another reason to take Clear Lungs is when this mucus and phlegm is dissolved you will no longer have a bacteria build up in the lung area that produces more inflammation and bacteria.

Vitamin D10 is our last product for COPD this is also very highly recommended. Vitamin D10 is essential to help rebuild the tissue in the lungs that has been damaged from scar tissue and bacteria. Vitamin D10 actually works in your body as a hormone. The benefits are tremendous as this product also has a profound effect on boosting your immune system and replenishing vital nutrients to rebuild our damages lungs.

Pivotal Health has many COPD and Pulmonary Fibrosis suffers that are seeing results within the first 30 days. We do recommend that you take these combinations of product for at least 6 months to achieve our goal of making your condition controllable and giving you back a quality of life that you had before this condition took control of your day to day living. Please click here to read more about each individual product. We also offer a product pulmonary time chart that will visually explain how to take the products and when and how you will achieve these results.

(CONTINUED FROM ABOVE)

He has gone from gasping after merely standing at his bedside to walking from our family room to the car parked in the driveway! Sure, he still gets somewhat short of breath, but not nearly as bad as before taking the enzymes. His cough, nasal drainage, and sleep is very much improved. He is sleeping through the night and feels much more rested throughout the day. Yesterday, he said to me "something good is happening to me, I can feel it". Being a medical person, at first, I was very skeptical about giving him the products, but now I am so thankful that I did. He will continue to take them for the rest of his life. Thank you Pivotal Health for giving us help and hope.

Rae, from Nebraska
