

# COPD Result Timeline

(Enzyme Therapy for COPD 6 Month Therapeutic Program and Life time Maintenance Program)

## Product Usage Chart:

- 1.Serracor-NK : 1 cap/3x a day
2. Serra RX80: 1cap/2x a day
3. Clear Lungs: 1cap/4x a day
4. Vitamin D10 when needed

## Introduction Phase Week 1

Your body needs to obtain a high amount of systemic enzymes. This phase will:

1. Begin to remove toxins from the lung tissue.
2. Cleanse the Liver and Kidneys.
3. Start the breakdown of Mucus and Bacteria.
4. Start the Dissolution of the outer layer of scar tissue in the lungs.

What you will notice:

1. Break up of Mucus and phlegm.
2. Reduction of tightness in the chest.
3. An improvement in breathing.
4. Slight energy increase.

## Product Usage Chart:

- 1.Serracor-NK : 3 cap/3x a day
2. Serra RX80: 2cap/3x a day
3. Clear Lungs: 1cap/4x a day
4. Vitamin D10 when needed

## Therapeutic Phase 2 Wk 2 thru Wk 4

Therapeutic Phase 2 of Enzyme Therapy will create the following changes within your body:

1. Outer layer of Scar Tissue will be dissolved.
2. Removal of all bacteria and toxins from the lining of the lungs.
3. Reduce Mucus by at least 50%.

What you will notice:

1. Reduction of phlegm and mucus.
2. An increase in oxygen uptake into the blood.
3. A ability to take deeper breaths.
4. Slight energy increase.
5. Less coughing and wheezing

## Product Usage Chart:

- 1.Serracor-NK : 3 cap/3x a day
2. Serra RX80: 2cap/3x a day
3. Clear Lungs: 1cap/4x a day
4. Vitamin D10 when needed
