- And so much more .....

Robert H. Keller, M.D.

MaxGXL™ was brought to the market in 2007 by Max International. The original composition patent for the formulation (Patent # 6,262,019) was awarded in 2001. A patent extension was granted in 2007 (RE 39,705) when the formulation was augmented. A double-blind, placebo controlled clinic trial completed in 2008 showed an increase of 292% in intracellular glutathione levels and an incidental finding of a 47% increase in DHEA.
