HOW TO PREPARE FOR A ROACH SERVICE

Offered to you as a courtesy from Any Pest to help us help you!

These are recommendations to help prepare you prior to your German Roach treatment (this includes regular pest control service and service calls):

1. Remove everything from the kitchen and bath cabinets. Place items on the table or floor away from the cabinet area to provide access.
2. Cover food goods or utensils. (Newspaper is sufficient).
3. If a problem is noted in your closets, remove clothing, shoes and other items for access. If in dressers, remove drawers and stack clear.
4. Clean up all dead roaches and egg cases. **THIS IS IMPORTANT!** Eggs can hatch even after the adult has been destroyed. This would mean thousands of new roaches entering your home.
5. Check all dry goods before putting them back up in the cabinets and, if at all possible, store them in sealed containers.

If you follow these recommendations you can help us to help rid your home of roaches with the fewest treatments possible. Control will be ineffective unless ALL precautions are taken.
