

JULY 2011

The month of June brought in a busy agenda, we were lucky to attend to the CSIRO travelling Science show arranged by the Sutherland Shire Council Family Day Care, kids had the opportunity to observe, listen and feel the hand-on experiments performed by the scientist who are part of the show, opening a world of discovery and amazement to the children, and how simple everyday items, are really science experiments at work, such as the tea' bag paper rocket

We also visited McDonald's Tarent Point, and would like to express my gratefulness to one of the parents a day care who volunteered herself to come along, Kids couldn't believe it until we arrived, as they were on their best behaviour and took advantage of their lovely play area at, Obviously we had to finish the day with their own happy meal, thanks to all Chiquitos' parents for your unconditional support and trust, to take them there.

We have been also dancing to a particular song, One Gorilla and a Flamingo in the zoo, kids have to choose a partner for dancing and copy the movements, such as hopping as a flamingo or walking in four feet as a Gorilla, great practice for their gross motor coordination.

One of the last activities during June, was 'cooking pikelets' where children made pikelets adding the different ingredients such as sugar, milk, eggs, etc... it was a great fun as they all sat at the table enjoying themselves, mixing all the ingredients while waiting for their turn, and most importantly eating them all up, with a bit of butter, and lots of patience. It was great to see their sense of achievement, and how proud they were when the final product went into their mouths
